Benifits

Reduce Fleet Costs

Consolidating data into one centralised, enterprise-wide fleet program you will be able to monitor and reduce financial investment

Increase Fleet Utilisation

Our fleet management software will ensure your fleet is operating at its full potential, which is essential in order to reduce costs

Job Card Management

Job Card Management is used to maintain your vehicle, so that vehicles continuously runs smoothly without any major interruption.

There are five below steps in job card modules

- Job Card Preparation
- Close Job Card Operationally and Financially
- Job Card Approval
- Job Card Bill Generation
- Bill Payment

Job Card Preparation		Job Card Approval		Bill Payment
	Close Job Card Operationally and Financially		Job Card Bill Generation	

● **Job Card Preparation**

Here, User can generate job sheet against particular vehicle based on vehicle number with details of the works need to be done on that vehicle.

Job Order Advance Payment
User can give advance amount to staff or vendor for particular job card.

● **Close Job Card Operationally and Financially**

Here, User can add expenses and move further by closing operationally and financially. Once Job Card get close by User, particular vehicle will be available for next movement.

● **Job Card Approval**

Here, User will approve the financially closed job card for further billing process.

● **Job Card Bill Generation**

Here, User can generate bill against particular vendor for multiple job cards.

● **Vendor Bill Payment**

Here, User can settle generated bill by paying to that particular vendor.

Tyre Management

Tyres can extend their life by retreading processes.

However, their identification has long been a tedious and dirty job, not to mention the tracking process of multithousands of tyres moving in and out of the retreading factories.

Assets are only assets when you have information about them, such as, where they are, what they do, where they have come from and where they are going. Effective stock and asset control assist in implementing a structured and reliable solution to track, trace and audit products during all phases of its lifecycle.

This module contains different stage to complete the Tyre Cycle.

Po

Generate Purchase Order For Tyre. At Generation Time Enter Quantity, Price, Discount, GST Of Tyre.
Tyre Model Ex, MRF-750-16, Apollo-750-16, JK100R-20 etc.,
